

Quality Sun Awnings and Canopies

TRANSFORM YOUR GARDEN WITH STYLE AND COLOUR

Enjoy entertaining and dining alfresco with an elegant, compact fully enclosed cassette awning, ideal for sun, rain or evening with our built in L.E.D lighting.

Extend your outside space and create a covered and heated area on your patio and enjoy your garden all year round.

Our Awnings can be operated manually or by means of an electric motor. We are also able to supply a variety of heating & lighting options for homes and businesses alike.

Bungalows, low soffits and cladding can have awnings installed with a special range of brackets that blend with your awning.

FIVE YEAR GUARANTEE ON ALL OUR AWNINGS

All of our Awnings are made to measure and you can choose from a comprehensive collection of plain colours, stripes and warps.

For our commercial customers, your awning can be printed with your company logo and in your own brand colours.

Our 302-PVC fabric is also available which is resistant to hot temperatures and extreme cold. The quality of this fabric is unmatched and is available in over 30 colours, and at 480 g/m² the 302 range offers a practical and stylish solution to all your shading requirements.

Giovanardi COLLECTION

B28

The B28 is our most popular and versatile awning and is available in a variety of sizes, fabrics and colours.

Operation by winding handle is available, however for ease and convenience, a remote controlled Somfy electric motor is available to operate the awning.

somfy®

Sun and Wind sensors are also available enabling your awning to open automatically to a set light level or retract if the wind is too strong.

Twinstor

The Twinstor is a “back to back” version of the B28 awning and can be supplied either freestanding (secured into flower tub style base feet) or via a more permanent in the ground anchor system. The Twinstor is a must have for any property where shaded areas away from the property are necessary. Typically this may be for North facing elevations or if large trees affect the positioning of shaded outside areas.

The B28 and Twinstor have a completely enclosed corrosion resistant cassette, which ensures the awning and components are protected from the weather and are maintenance free.

The Monza

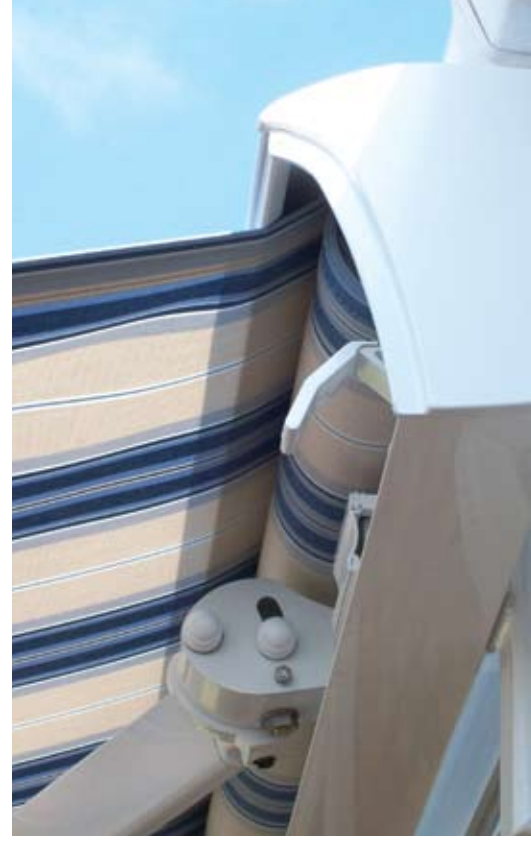

The Monza cassette awning and larger Monza Plus have true Italian Style yet they are competitively placed in the market to suit all budgets. With powder coated white cassette box and arms as standard and available up to 6.0m width x 3.0m projection, the Monza suits most applications. Choose either smooth crank handle operation or Somfy motor with remote control for total ease. End fixation is made simple with an easy install bracket.

B35

The B35 is an elegant yet extremely strong awning ideal for exposed locations and large sizes up to 14m width x 4.0m projections and is ideal for both commercial or domestic uses. The Type I B35 awning has the top, front

and underside enclosed to house the acrylic canvas fabric and offers a lot of weather protection due to the adjustable pitch of angle available. The B38 version has a built in electric or manual wind down valance option for extra solar protection.

Dutch Canopy

Dutch Canopies enhance and shade your windows, offering maximum protection from the weather when retracted and protects your furniture from harsh sunlight.

Dutch Canopies have been used in homes and businesses for decades. Our canopies can be made either rigid or fully retractable to suit your specific circumstances. Fabrics are either acrylic canvas or PVC and can be supplied fully printed with logos.
